**and here a little bit of homework....**

1. if you have elements in your pathway to diploma or in your institution which you want to add: fill in the empty boxes.
(You can create more boxes through simply paste-and-copy one of the existing ones and change the wording. You can move them around freely.)

**please do NOT MOVE the existing boxes with elements in.**

2. **Print both pages on white paper.**
3. **enlarge both pages onto A3 on a photocopy machine.**
4. **if possible, print/copy the A3-sheets on TRANSPARENT PAPER.**

**Bring all the prints to the meeting!**

**Now, we can play.**

But if you are a playful designer, you might want to play at home already, for example filling the boxes with color.... (what do I have/what would I need and so on).
Or – you might have guessed it – make connections / interactions / find functions between the various elements (my suggestions: don´t bother with computers.... by hand it looks so much nicer!)

**HAVE FUN**

**ENJOY**
